

SEO-Reloaded Announces New Web Directory Launch for 1MillionBusinesses

Ms. Syed, founder of SEO-Reloaded, is excited to announce the launch of a fully functional, responsive and mobile friendly internet web directory 1MillionBusinesses, The directory with a purpose!

Lahore, Pakistan - October 01, 2015 - [1MillionBusinesses](#), the directory with a purpose, has been launched by SEO-Reloaded with an improved, unique, responsive and search engine friendly design.

The paid web directory is a venture by Afroz Syed, founder of SEO-Reloaded, an offshore search engine optimization firm that has been providing SEO and online marketing services to clients worldwide since the last 8 years.

The business directory incorporates a fully functional and responsive design to cater to the requirements of search engines as well as internet users. Ms. Syed stated, "According to Google's mobile ranking algorithm, popularly known as Mobilegeddon, that began April 21, the search engine giant is now favoring mobile-friendly websites in search results more than ever." Search engine friendly websites with a responsive design are also favored over traditional websites.

Due to the lack of modern web directories present on the Internet, that have a responsive and mobile friendly design, there was a need to launch a web directory which meets these requirements. With more than 1,500 categories and sub-categories, the directory is suitable for just any business, whether it is virtual or has a real presence.

"I am very proud of this venture and I hope it will become a success soon!"

Ms. Syed graduated from Lahore University of Management Sciences in 2004, majoring in Computer Science with minor in Mathematics, and has been running her own SEO business ever since. This web directory is just one of the many projects she has undertaken. She aims to raise \$1 million via this directory to support her ventures and to make this world a better place.

Ms. Syed is also the President of a registered non-profit organization she is running for Multiple Sclerosis Patients in Pakistan by the name '**Society for Multiple Sclerosis Patients in Pakistan**'. Being an MS patient herself since the past 5 years, she believes that nothing is impossible. Through her Society, she is helping underprivileged MS patients and aims to create awareness about the disease in her country. The MS Society website can be visited at www.SMSPP.org.pk
